

Year 5 Snow Day Activities.

Maths:

- Investigate how many different examples you can come up with where we use and talk about fractions in everyday life.
- Select three jobs and write about how that career would involve needing to know and understand fractions.
- Create a colourful poster using pictures and diagrams to explain how equivalent fractions work for your class's Working Wall.
- Continue to practise your timestable and division facts.

English:

- Create your own mythical Greek beast; draw an illustration and write a short paragraph describing where it lives; what it eats and what it looks like.
- Create a cross or word search relating to Ancient Greece.
- Research some different Greek myths. Write a short summary to explain what the myth is about, including key characters, problem and resolution.

Science:

Please follow the link below which has many fun ideas about science experiments that can be carried out at home with snow:

<https://science.howstuffworks.com/innovation/scientific-experiments/10-science-experiments-to-do-in-snow7.htm>

Children in 5S, please continue to learn the words for our class assembly, along with the song!
